

畜禽空气过滤系统

Overview of filter training pathogen barrier

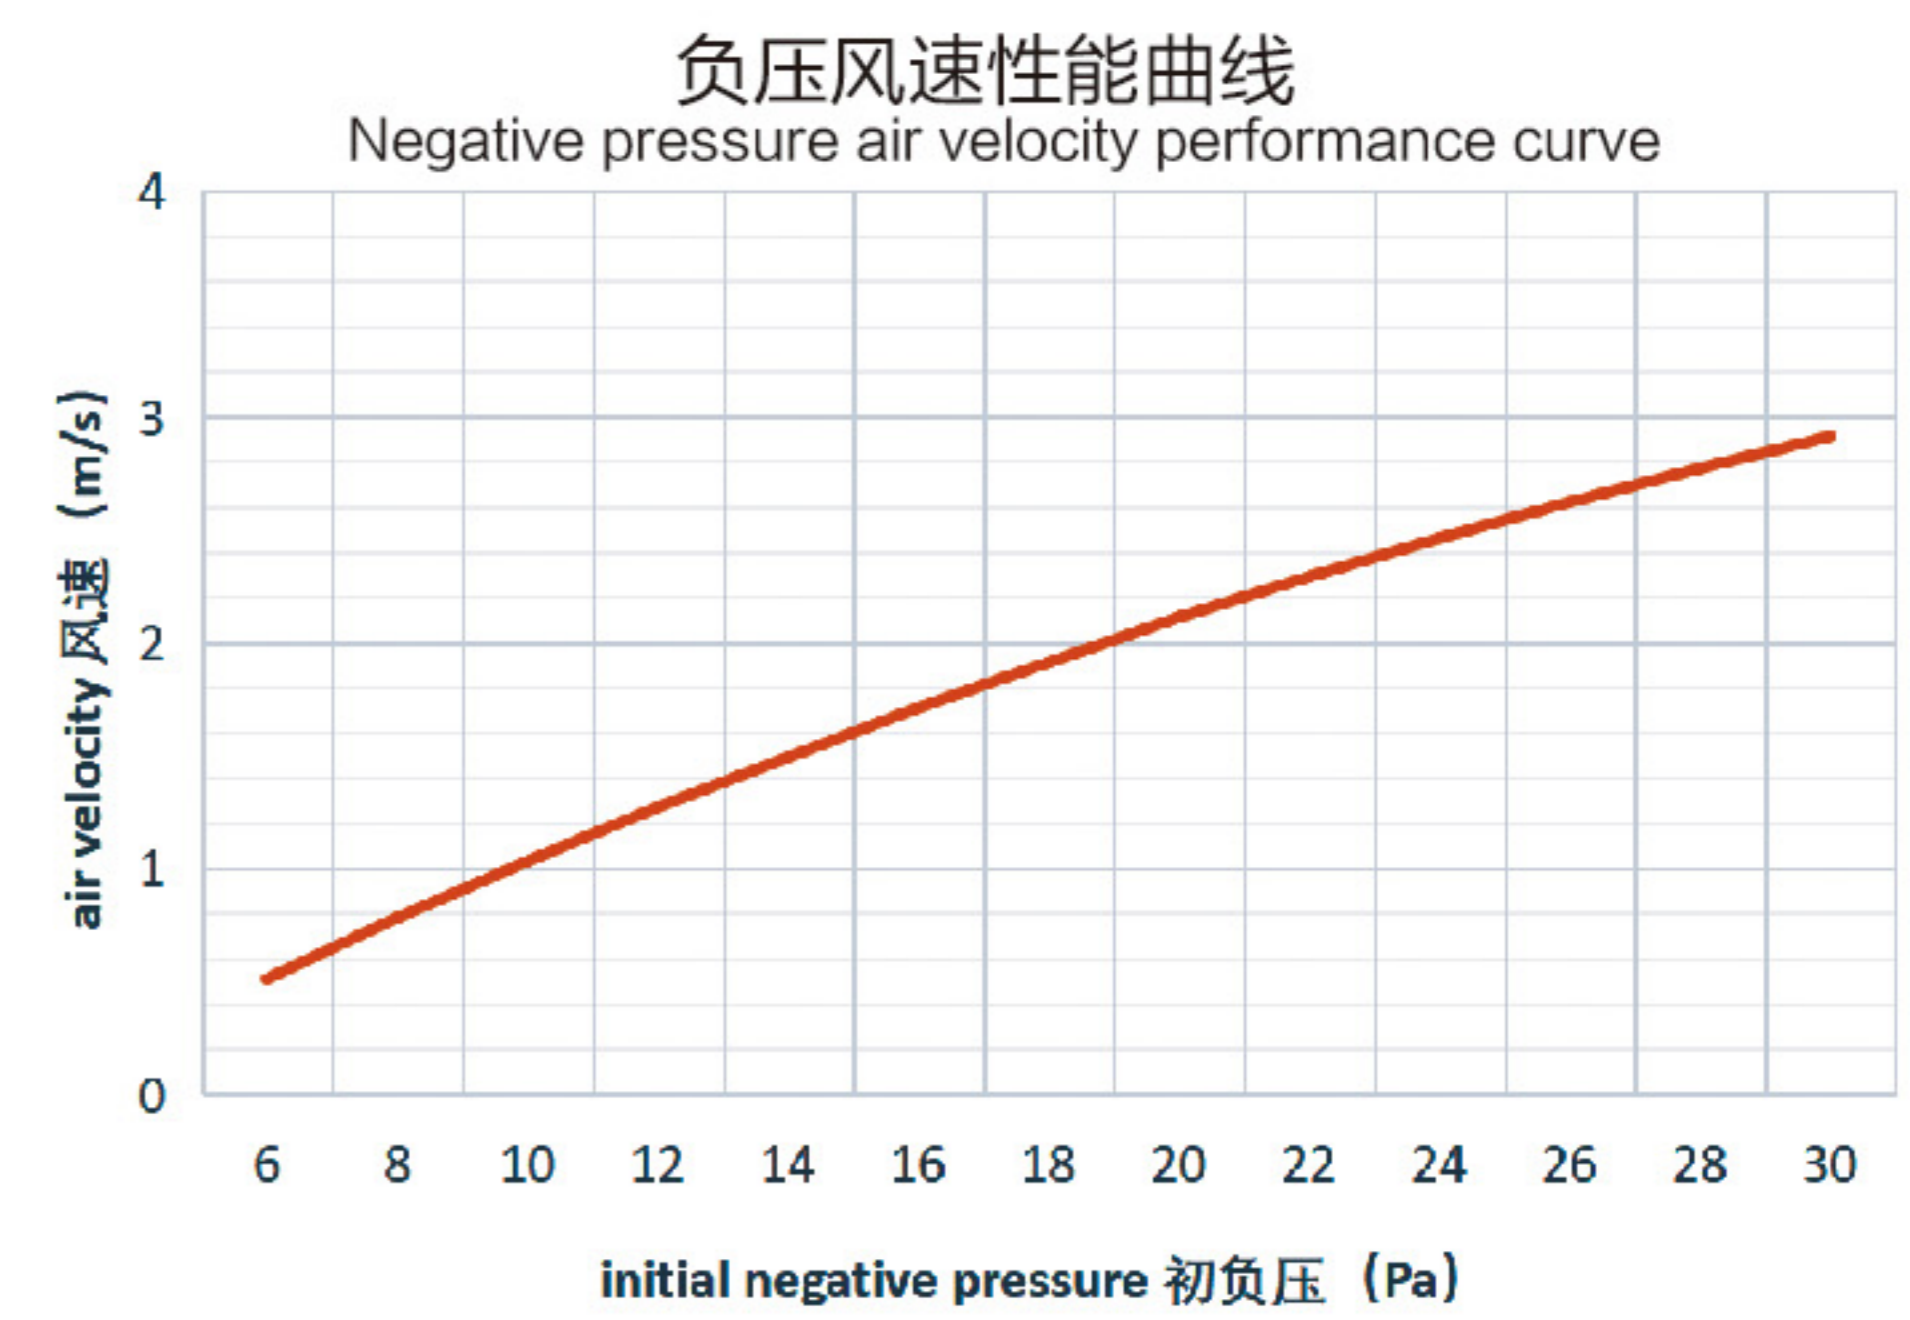

空气过滤系统是阻断致病病原体通过空气传播的有效方式，空气夏季通过三防网和过滤墙的过滤进入猪舍，空气冬季通过吊顶空气过滤的过滤进入猪舍，使猪舍一年四季获得新鲜空气。

The filter training pathogen barrier is an effective way to block the spread of pathogenic pathogens through air. As air enters the pig house through the three-protection net and filter wall in summer, and through the ceiling air filter in winter, the pig house can get fresh air all year round.

W型初效过滤墙 / Type W primary filter wall

- 专利内嵌式V型支架，过滤棉无损伤；
 - 特制压棒，连续性压紧，密封效果好；
 - 免工具拆装，过滤棉更换简单便捷；
 - W型框架结构，展开面积大，风阻小；
 - 模块式铝合金框架，结构稳定耐用。
- Patent embedded V bracket, no damage to filter cotton;
 - Special pressure rod, continuous pressure, good sealing effect;
 - No tool disassembly, simple and convenient replacement of filter cotton;
 - W frame structure, large expansion area, small wind resistance;
 - Modular aluminum alloy frame, stable and durable structure.

几字型过滤墙 / Filter walls

- 几字回廊结构，通风面积大，负压小；
 - 铝合金框架，不锈钢配件，防锈耐用；
 - 初效、亚高效搭配使用，过滤效果好；
 - 铝塑板密封，边缝打胶，密封性能好。
- Corridor structure, large ventilation area, small negative pressure;
 - Aluminum alloy frame, stainless steel fittings, rust proof and durable;
 - Primary effect, sub-efficiency with good filtering effect;
 - Aluminum plate sealing, edge seam glue, good sealing performance.

初效过滤器品牌 Primary filter brand	规格 Specification	过滤等级 Filtration level
洁斐然	592*592*45	G4
康斐尔	594*594*45	G4
AAF	594*594*44	G4

亚高效过滤器品牌 Sub-high efficiency filter brand	规格 Specification	过滤等级 Filtration level
洁斐然	592*592*295	MERV15
康斐尔	592*592*296	MERV15
AAF	592*592*292	MERV15
